Maryland

Technical Skills

NextJs, ReactJs, Typescript, JavaScript (ES6+), Bootstrap 5+, Tailwind CSS, SCSS, SASS, RESTful APIs, CI/CD, GIT, WordPress, Azure Web Services, SQL, C#, .Net Core 6+

Experience

Stanley Martin Homes | Senior Front End Developer – 2018 – Present

- Designed and developed new homebuyer experience, resulting in a 36% revenue increase and 13% reduction in bounced rates
- Utilized Axure RP, SASS, C# .Net, Bootstrap 5, and SQL to create mockups, prototypes, style guides, and web applications
- Managed development contributions and leveraged NPM package ecosystem and GIT for multiple projects and continuous integrations
- Utilized Azure ecosystem to host web apps, functions, and dynamic feeds to serve vendors such as Zillow, BDX, and Realtor
- Designed and developed intranet using new SharePoint Experience with PowerShell CLI
- Implemented Salesforce Pardot forms to permit CRM interactions and UTM parameters to track leads

Liquidity Services | Senior Front End Developer – 2014 – 2017

- Designed new user experience strategies, theme design, wireframes, templates, and web style guides
- Developed multiple websites incorporating internal business requirements and processes using the MVC framework
- Provided front-end support for new component features and interfaces to various software engineers
- Leveraged Redis to handle multiple database instances and synchronization for various staging environments
- Utilized SASS syntax structure, variables, and function encapsulation to significantly decrease repeating CSS and improve UI consistency
- Organized and constructed website content to meet friendly usability, web 2.0, and 508 compliance standards
- Developed and designed various e-commerce marketplaces for internal markets such as Network International and GovDeals

Fishbowl Marketing | Front End Developer – 2013 – 2014

- Developed a new corporate website using WordPress and Bootstrap
- Created new introduction videos for new brand identity using Adobe After Effects
- Maintained site features and implemented new marketing content
- Created emails, newsletters, landing pages, and videos for marketing
- Developed an intranet to host client documents using WordPress
- Researched, wireframed, and designed a new user interface to create client-side emails

VersaTech Inc | Front End Developer – 2011 – 2013

- Designed and maintained websites using WordPress and modern CSS methodologies to improve user experience and accessibility
- Developed custom themes using Dreamweaver, CSS, and HTML5, and implemented Search Engine Optimization (SEO) techniques with Google API services to improve website visibility and page rankings
- Developed new websites for acquired clients, including the Defense Contract Audit Agency, and ensured compliance with industry standards and guidelines
- Converted Word documents into clean HTML files and ensured 508 compliance for the Food and Drug Administration

Open-Source

Crypto Jackpot | Blockchain Game – www.cryptojackpot.win - 2019

- Designed final mockups and developed front-end in ReactJs using Web 3.0
- Utilized React Hooks to decrease instances of class-based components, improve readability by facilitating code modularity
- Leveraged SASS, variables, and function encapsulation to significantly decrease instances of repeating CSS
- Implemented styled components to provide a solution for styling and responsive design
- Constructed a sustainable structure of code by centralizing styling concerns at the component level, extending, exporting, importing reusable styles as needed, and decreasing HTTP server requests to load assets and resources

Education

- Bachelor of Fine Arts in Web Design & Interactive Media - The Art Institute of Washington 2010
- High School Diploma – Frederick Douglass High School 2006

Achievements

Stanley Martin homes

- Developing ASP.NET Web Applications as a Lead User Experience & User Interface Designer. Successfully launched a corporate site and content management system from back to the front end.
